SimpliLoad End User License Agreement (EULA)

Version 1.2 — Hofstetter Computer Consulting LLC

Effective Date: September 20, 2026

1. Grant of License & License Scope

Hofstetter Computer Consulting LLC (“Licensor”) grants the customer (“Licensee”) a non-exclusive, non-transferable, non-sublicensable license to download, install, and execute the SimpliLoad software (“Software”) solely for Licensee's internal business operations, subject to the terms of this Agreement and the specific license tier, environment designation, and usage limits selected by the Licensee at the time of purchase or activation (the “Authorized Scope”).

1.1 License Tiers and Scope

- **Free Trial Version:** If Licensee accesses the Software under a Free Trial, Licensee is granted a limited, revocable license strictly for evaluation and functional testing purposes. The Free Trial Version is restricted to executing a maximum of one (1) report and one (1) iteration per test run. Any execution beyond this limit requires a paid license entitlement.
- **Per-Environment License:** If Licensee purchases a Per-Environment Tier, the Software is licensed strictly for execution against one (1) specific IBM Cognos Analytics environment, cluster host, or dispatcher URL designated by the Licensee during installation or initial configuration of the Software. Each additional Cognos environment requires a separate license.
- **Enterprise / Unlimited Tier:** If Licensee purchases an Enterprise Tier, the Software may be deployed and executed across multiple IBM Cognos Analytics environments managed directly by Licensee's internal organization.

2. Restrictions

Licensee may not, and shall not permit any third party to:

- sell, sublicense, lease, distribute, or otherwise transfer or share the Software with any third party;
- modify, decompile, reverse engineer, disassemble, or attempt to derive the source code of the Software;
- execute the Software against any Cognos Analytics environment, cluster, or dispatcher URL outside the Authorized Scope designated by the Licensee during installation or initial configuration of the Software;

- use the Software to develop or test competing products or services;
- remove, alter, or obscure any proprietary, copyright, or trademark notices;
- use the Software outside Licensee's internal business operations or for commercial service bureau processing without an express Consulting Partner License.

3. Ownership

Licensor retains all rights, title, and interest in and to the Software, including all source code, design elements, REST API interfaces, documentation, and intellectual property rights. Licensee receives only the limited execution rights expressly granted in Section 1 of this Agreement.

4. Compliance & Verification

Licensee agrees to maintain accurate records regarding its deployment and execution of the Software. Upon reasonable notice, Licensor may request, and Licensee shall promptly provide, written certification confirming that Licensee's deployment and usage of the Software strictly complies with the Authorized Scope and the Cognos Analytics environment(s) designated by the Licensee during installation or initial configuration of the Software.

5. Updates

Licensor may, at its discretion, provide software updates, security patches, or feature enhancements. Maintenance and updates are provided solely during active, paid subscription periods or per the applicable SimpliLoad Support Policy.

Updated versions of this Agreement are included with each new Software release. Licensee's continued use of the Software after an update constitutes acceptance of the revised Agreement.

6. Support

Support is provided according to the current SimpliLoad Support Policy. Licensor is not obligated to provide support for unsupported Cognos environments, modified software builds, or deployments outside the Authorized Scope.

7. Disclaimer of Warranties

The Software is provided “AS IS” without warranty of any kind, express or implied, including but not limited to warranties of merchantability, fitness for a particular purpose, non-infringement, or accuracy. Licensee assumes all risks associated with the deployment and performance testing executed by the Software.

8. Limitation of Liability

To the maximum extent permitted by law, Licensor shall not be liable for any indirect, incidental, special, consequential, or punitive damages, including but not limited to loss of revenue, loss of data, business interruption, or system downtime, arising out of or related to the use or performance of the Software.

Licensor's total aggregate liability for any claim arising out of or related to this Agreement shall not exceed the total amount paid by Licensee for the Software during the twelve (12) months preceding the claim.

No Production Load Testing

Licensee acknowledges that executing load tests or automated stress tests against production environments may cause service degradation, dispatcher failure, memory exhaustion, database locking, or operational outages. The Software is designed for pre-production, staging, and sandbox validation. If Licensee chooses to execute tests against a production system, Licensee does so entirely at its own risk. Licensor shall have zero liability for any damages, downtime, or operational disruption resulting from production stress testing.

9. Termination

Licensor may terminate this Agreement immediately upon written notice if Licensee breaches any of its terms (including failure to pay applicable fees or violation of license scope). Upon termination, Licensee must cease all execution of the Software and destroy all installed instances in its possession.

10. Governing Law & Jurisdiction

This Agreement shall be governed by and construed in accordance with the laws of the State of Illinois, USA, without regard to conflict-of-law principles. Any legal action arising from this Agreement shall be brought exclusively in state or federal courts located in Illinois.

11. Entire Agreement

This Agreement, together with any license tier selections made by the Licensee at the time of purchase, constitutes the entire agreement between the parties regarding the Software and supersedes all prior or contemporaneous agreements, proposals, or understandings.
